Amezcua Bio Disc+

Water Re-Defined

Water is one of the most essential requirements for the human body to not only perform at its peak, but to function at all. As a prerequisite to a healthy life, we must ensure the hydration level in our body is always being replenished to account for the almost two litres of water we lose throughout each day. Drinking water is vital, however, there is a way to enhance and improve the biocompatibility of water molecules. There is also a way for your drinking water to increase your energy and harmony levels at the same time! And it's simply by drinking water that has been energised and enhanced by the Amezcua Bio Disc.

The Amezcua Bio Disc has been evaluated by various institutions and is known to reduce water surface tension value. This in turn makes water more hydratious, therefore improving the compatibility of water molecules with the body's cells. Water treated with the Amezcua Bio Disc also produces beautiful and perfectly shaped water crystals, an indication of water with high energy levels and good quality. Various test results also reveal that the Amezcua Bio Disc can increase the energy and harmony levels in those who use the disc or drink water treated with it.

The Amezcua Bio Disc is made of technically engineered natural minerals, structurally bonded in glass at a molecular level using high-heat fusion methods. Through this combination of minerals and fusion techniques, a positive energy field is created.

Amezcua
Energy Shell+
Your Domestic Water Booster

We use water in every aspect of our daily lives. Both the body and the mind rely on good, clean water to foster a greater well-being. So why not find a way to improve the quality of your shower and washing water as well?

The Amezcua Energy Shell is a remarkable scientific breakthrough that provides you with hydratious, energy-enhanced water. Manufactured from pure aluminium, the Amezcua Energy Shell produces the same positive energy as the popular Amezcua Bio Disc.

The result? Instantly energised water! Taking a shower with enhanced water through the Amezcua Energy Shell will leave you refreshed and your energy levels balanced and harmonised.

You can also enhance your washing water by attaching the Amezcua Energy Shell onto the inlet hose of your washing machine or dishwasher. The energised water carries detergent thoroughly into materials due to its surface tension value being close to that of pure water. • Dr med. Michael Kucera

Dr Kucera is an internationally active medical doctor from the Czech Republic who is responsible for introducing the potential of Mitochondrial Medicine as a basic therapeutic tool. Dr Kucera monitors the efficacy of the therapy by heart frequency variability measurement. Dr Kucera was awarded the International Mitochondrial Medicine Association (IMMA) Prize in 2000.

Increased Energy and Harmony Levels in Human Body; Decreased Stress Levels in Human Body

A preliminary observational study indicated that when wearing the Amezcua Chi Pendant or drinking water treated with the Amezcua Bio Disc, users experienced reduced sympathetic activity of the nervous system, thereby reducing tension, increasing reserves of stress adaptation capabilities, increasing parasympathetic activity, and increasing energetic reserves. The test also showed a harmonising effect in cooperative relation between sympathetic and parasympathetic parts of the autonomic nervous system; this improves regulatory and adaptation mechanisms. Dr Kucera also showed that after one week of not using the Amezcua Bio Disc or the Amezcua Chi Pendant, the benefits to the users' cardiovascular function, regulatory systems and stress levels fell back to near default values.

Individuals involved in the tests manifested reduced symptoms, including better sleep, reduced tension, improved psycho-emotional disorders, and increased energy activities.

• PROGNOS, Germany

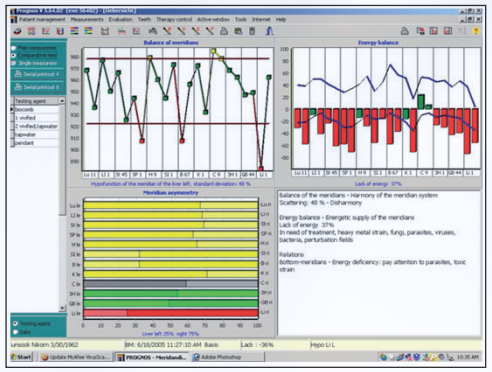

PROGNOS is a diagnostic and therapy system based on traditional medicine that uses a painless method to create a picture of the energetic state of the body. This is measured through the subject's meridian system, which is the energy course of the human body. PROGNOS and its manufacturer, MedPrevent, have been accredited with EC and ISO certifications by the EUROCAT Institute for Certification and Testing.

Positive Energy Fields

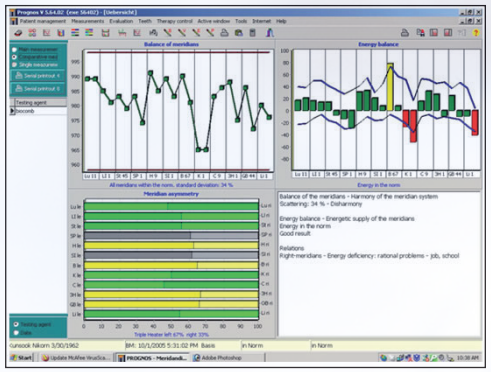

PROGNOS machine tests show that the Amezcua Bio Disc, Amezcua Pewter Bio Disc, Amezcua Chi Pendant, Amezcua Energy Shell, and Amezcua Straw Tube all possess a positive energy field. Test results also showed that after drinking water treated with these products or when wearing the Amezcua Chi Pendant, the user's energy levels were increased and the disharmony of their meridian system was thereby reduced.

Example of the Amezcua Bio Disc PROGNOS test results:

The user's energy levels were increased and the disharmony of their meridian system was thereby reduced from 48% to 34%.

• Dr med. Manfred Doepp, Germany

Dr med. Manfred Doepp is a member of the Board of the German Society for Energy and Information Medicine e.V., Stuttgart. He is also a reviewer of the International Society on Systemics, Cybernetics and Informatics, as well as the International Society on Computer, Communication and Control Technologies.

Positive Energy Fields

The effects of the Amezcua Bio Disc, the Amezcua Chi Pendant, and the Amezcua Energy Shell on the quality of water and the bioenergetic state of the human body were tested by Dr med. Manfred Doepp at the Holistic Center in Germany, using meridian diagnostics. The test results show that the Amezcua Bio Disc, Amezcua Chi Pendant, and the Amezcua Energy Shell have a successful operational area in the energetic-informational treatment of liquids and water containing nutrients.

The results show that these products have a positive effect on water. Water treated with the Amezcua Bio Disc and the Amezcua Energy Shell has an increased level of energy and harmony. Test results also reveal that when the Amezcua Bio Disc and the Amezcua Chi Pendant are held, the holder's energy and harmony levels show a significant increase.

Protection Against Electro-Smog

Electro-smog is the result of electromagnetic fields created by electronic equipment in our environment such as mobile phones, computers, lightings, air-conditioners and other electrical appliances. The meridian diagnostics test shows that the Amezcua Chi Pendant is able to neutralise the negative effects of electro-smog, as well as improve and harmonise the energy levels of the user.

• PSB Laboratory, Singapore

PSB test reports are widely recognised by manufacturers, third-party buyers, and government authorities in Singapore. Its laboratories are also accredited under the Singapore Accreditation Council – Singapore Laboratory Accreditation Scheme (SINGLAS) to ISO 17025.

Water Surface Tension Value

Results show that after treatment by the Amezcua Bio Disc, Amezcua Pewter Bio Disc, Amezcua Energy Shell, and Amezcua Straw Tube, the surface tension value of the treated water has come close to that of pure water. The change in surface tension value renders the water more bioavailable, thus improving the compatibility of water molecules with the body's cells. It also means that treated water carries detergent thoroughly into materials, again due to its surface tension value being close to that of pure water. This means a more efficient and effective washing of your laundry or dishes, allowing you to reduce the amount of detergent used. With less detergent used, wastewater discharged from the washing machine is more environmentally friendly.

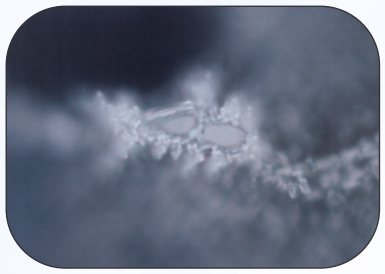

• I.H.M. Institute, Japan

The I.H.M. Institute in Japan was founded by Dr Masaru Emoto, a Doctor of Alternative Medicine. Dr Emoto achieved international acclaim through his extensive research of water around the world. He is also the President Emeritus of the International Water for Life Foundation.

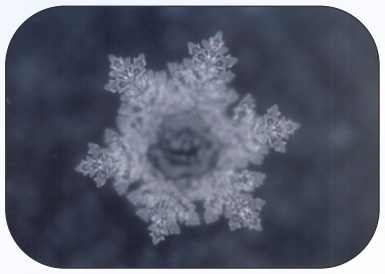

Energy Levels in Water and Water Quality

Research has revealed a correlation between the formation of water crystals and the quality of water, in terms of the degree of pollution. In recent I.H.M. Institute research, it became clear that energy could affect the formation of water crystals. Thus, the water crystal formation reflects not only physical but also informational or energetic aspects of water. Water samples with a good balance of minerals and energy tend to produce beautifully formed crystals.

A water crystal experiment conducted at the Institute showed water treated with the Amezcua Bio Disc produces beautiful and good water crystals, compared to normal distilled water. The treated water was found to have less 'depressed' water crystals.
