IN-VOICE | TELECOM PRODUCT LINE

IN-VOICE

In-Voice

Stay conveniently connected anytime and anywhere with In-Voice, the Intelligent Voice, a revolutionary telecommunications product line exclusively distributed by QuestNet. With In-Voice, getting in touch with your loved ones and business partners has never been cheaper and easier.

A Convergence of Technologies

In-Voice combines VoIP (Voice over Internet Protocol/ Internet call) technology with your existing telecommunication facilities such as landline, mobile phone, and Internet services.

Cost Saving

The convergence of technologies allows In-Voice to save up to 80% off your telecommunication expenses. There are even ways to stay connected for **FREE*!!**

Flexibility, Mobility and Convenience

In-Voice provides you all-in-one telecommunication solutions. The service can be used in so many different ways-through your landline, mobile, personal computers, In-Voice exclusive hardware, even pay phones anywhere, anytime. The choice is yours.

Take Control

Manage your account, track your usage and never miss any new opportunity. Everything can be done and monitored online through your personal account manager page.

Continuous Upgrade and Support

We strive to bring you nothing but the best. Backed up with our own telecommunications service provider in the UK, we continuously search for new technologies for better quality of service and new features. The more, the better. Our technical team is always here, our support is completely yours.

OnNet calls within In-Voice network is free of charge

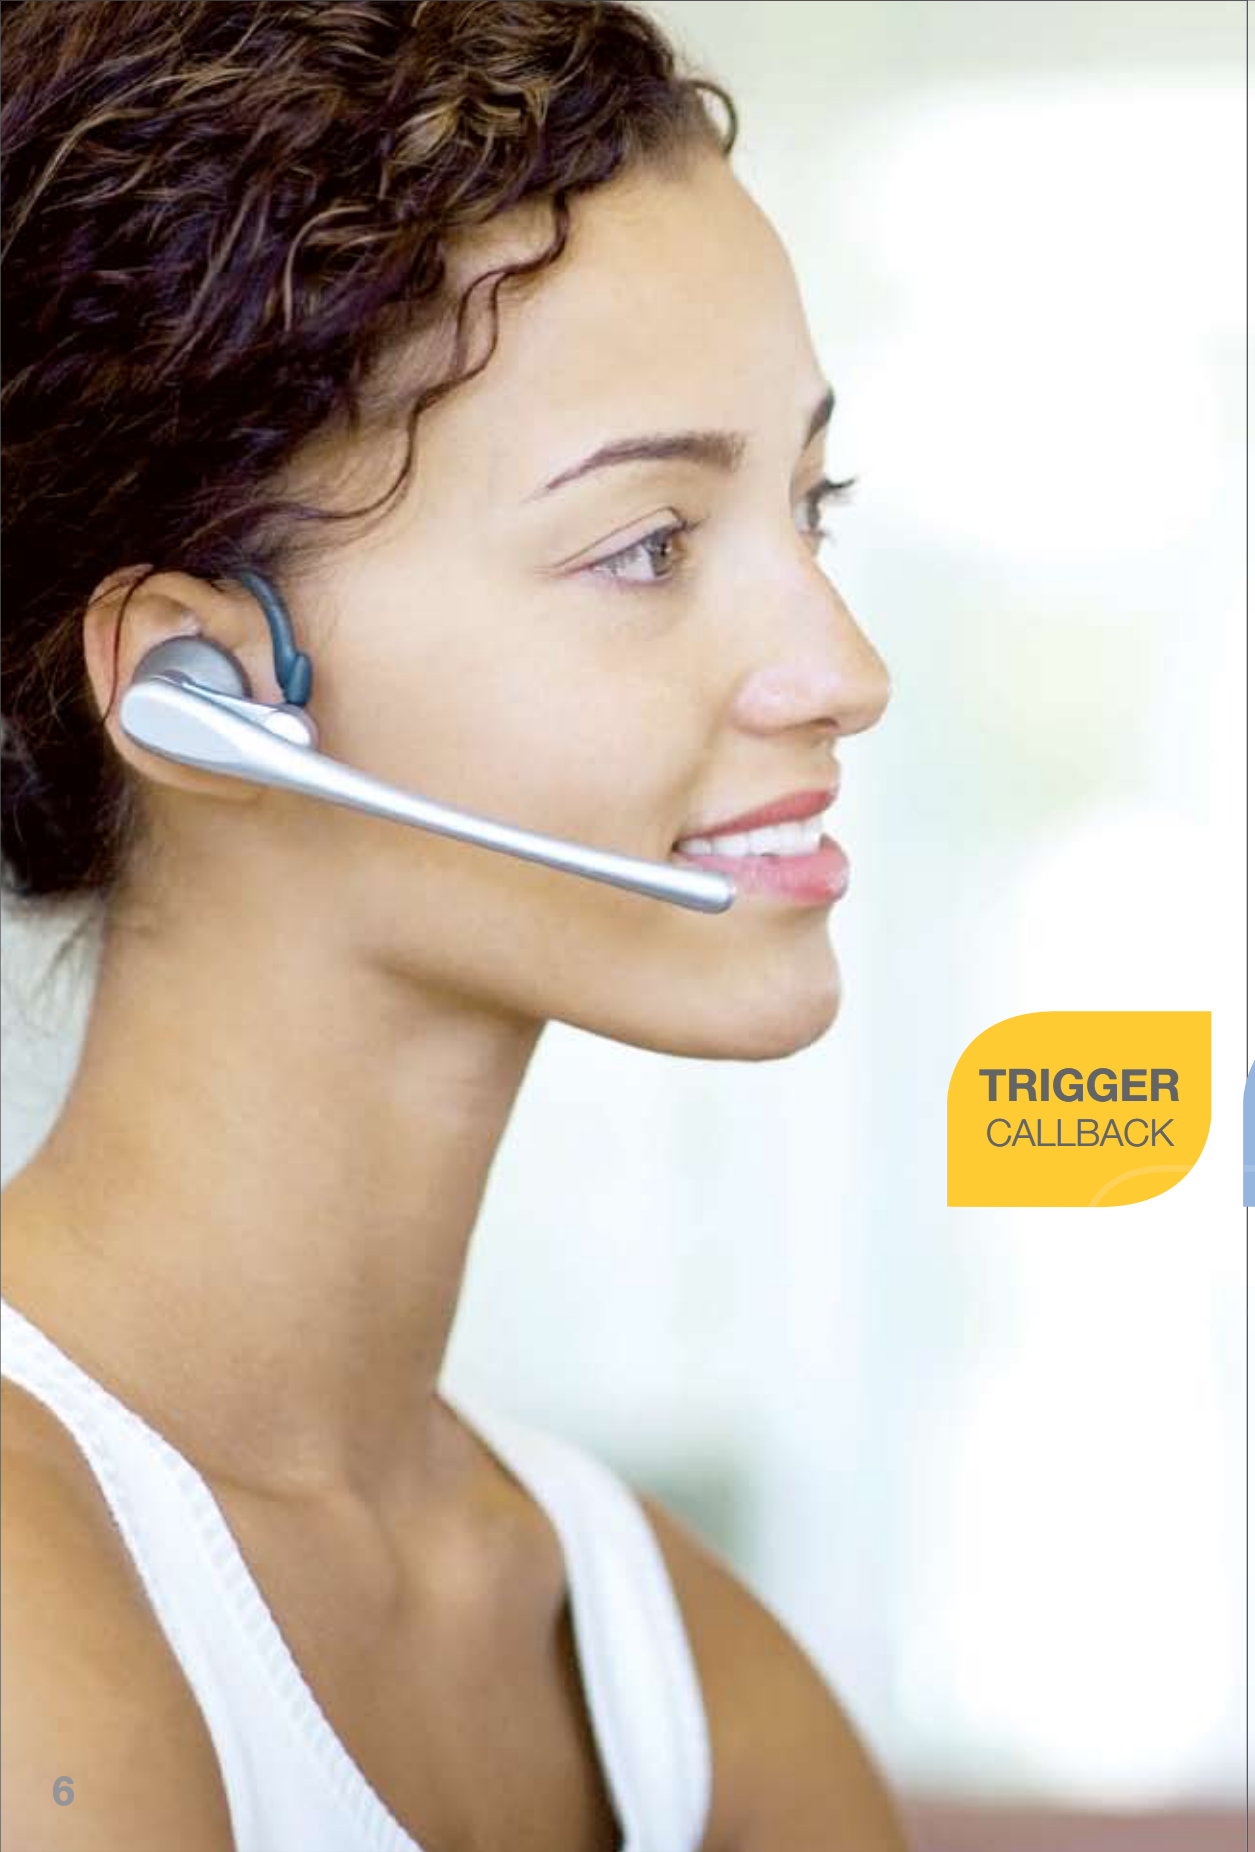

IN-VOICE

HOW DOES IN-VOICE WORK?

To put it simply, In-Voice technology works with your local t elecommunications f acilities allowing u s to use the cost-saving benefits of the Internet.

The technology which allows this is a new concept within the telecommunications industry - the Virtual Local O perator (VLO). A VLO i s a local company or i ndividual w ho p rovides a w ide portfolio o f telecommunications services t o local customers without investing in the physical plant. These services have traditionally been provided by local telephone companies i n your community. The g raph above illustrates how In-Voice technology works.
